POINT QUALITE

An international expert recognized from design to the manufacturing of innovative healthcare industry-specific plastic solutions

Union Plastic, certified NF EN ISO 13485 and NF EN ISO 15378, designs and manufactures innovative plastic solutions for human and animal health.

With over 60 years' expertise in the **Pharmaceutical, Veterinary, Medical and Diagnostic** markets, the company draws on its technical know-how in plastic injection molding, and boasts state-of-the-art equipment to meet the needs of markets with demanding applications.

An extensive range of certified high-quality products:

DOS'UP[®] Dosing systems for liquids or powders

APPLISIL[®] Local application systems

SPRAYLINE[®] Respiratory devices

UP'PHARM[®] Primary and secondary pharmaceutical packaging

MEDIC'UP[®] Devices for transferring, injecting and reconstituting drugs

VETIRAL[®] & **VETILINE**[®] Veterinary drug administration syringes

VETIMAX[®] Complex devices for vaccination and insemination

VETOCIDE[®] Device for anti-parasitic treatment

•
4 production sites operating 24/7

•
20,000 m² of covered space, including
1,000 m² OF CLEAN ROOMS

•
2 Billion plastic parts
produced annually

•
More than 400 injection molds

Union Plastic is a subsidiary of the international OMERIN Group and benefits from the dynamism of its 1,700 employees

omerin

Eco-responsible Health Plastics

Our CSR commitments

- 20% *self-consumption* of electricity thanks to the 3,700 m² of photovoltaic panels installed on our plants
- Supporting our customers in an *Eco-design approach*
- *Reducing and recovering our waste and scrap*
 - Sustainable investments in our production facilities
 - Developments incorporating product recycling. Our DOS'UP+[®] and APPLISIL+[®] devices are made from 100% Polyolefins for improved recyclability.

Union Plastic's Bioplastic offering

As a plastics manufacturer that is a pioneer in the use of renewable energy, Union Plastic supports its customers in sustainable development by working on **eco-design, waste reduction, lower energy consumption** and the use of new **more sustainable materials**.

We offer our partners a range of bioplastics:

• **Organically sourced products**

Based on natural fibres such as maize starch, Polylactic acid and PBS

• **Biodegradable**

Under industrial conditions in a recycling centre

For each application, our design office validates the specifications and conditions of use.

Renewal of the injection molding machines with latest-generation electric presses: power consumption reduced by 30% and noise by 80%

99%
of waste
recycled

Preserving health
and protecting the environment

Benefits of Bioplastic solutions

- Limit the use of fossil fuels
- Reduce the impact of waste disposal at the end of a product's life
- Technical properties comparable to traditional materials
- Materials certified suitable for food contact

Your partner
to bring your new projects to life

Innovation

More than 30 concepts proposed each year. Our design team works in partnership with your R&D and Marketing departments to jointly develop the concepts of your future products..

We integrate all forms of expertise in a qualified system, from initial analysis of your requirements to validation of pilot runs:

- Needs and risk analysis
- CAD, Computer-generated image
 - Rheological studies
 - Mock-ups
- Internally created prototype molds
 - Material source selection
 - Validation of pilot runs

- Co-development of your products and consumables
- Qualification of manufacturing processes
- Integration of existing tools

Development

Union Plastic possesses a team dedicated to development comprised of project managers, developers and metrologists.

Industrial excellence

The manufacturing of Union Plastic products is secured by four Back-Up production sites: Three in France and one in Tunisia.

Optimised automated or manual assembly

*More than 25 automated lines with robots.
Creation of complex products containing up to 12 parts*

Our cutting edge clean room production lines (ISO9 - ISO8 - ISO7 areas) cover an area of 20,000 m² to meet all your needs in terms of reactivity, flexibility and results.

Plastic injection molding and injection blowing

More than 100 injection presses

FULL SERVICE*

- LASER & OFFSET printing
- Customised labelling or packaging
- In-house EtO sterilisation

**More information on p.59 of the catalogue*

Manufacture of prototype molds and integrated maintenance

Strategic file confidentiality

Optimising performance and tool guarantees

Quality, the backbone of our organisation

Uncompromising quality

our quality system conforms to GMP* and has, for several decades, ensured that our productions are compliant, providing you with guarantees of safety and hygiene.

ISO 17141 and ISO 14644-1 for contamination and environmental control
* Good Manufacturing Practice

Control

- 3 metrology laboratories
- 300 managed control appliances

US DRUG MASTER FILE (DMF) No. 36044

Medical devices concerned:

- **DOS'UP®** measuring cups
- **DOS'UP®** dosing syringes
 - **DOS'UP®** Spoons
- **DOS'UP®** and **DOS'UP+®** pipettes
- **APPLISIL®** applicators

NF EN ISO 15378:2018

NF EN ISO 13485: 2016

0459

n°3002477874

Regulatory expertise

- Management of medical device registration, CE marking, and UDI traceability (MDR compliance)
- Delegation of controls

MEDIC'UP® JM3A

52

PRE-FILLED SYRINGE

PARENTERAL ROUTE

Customer-specific product

MEDIC'UP® pre-filled syringes are used to inject medical solutions. Union Plastic has 20 years' experience in injectables and applies all its know-how to design and develop specific products with our customers.

CHARACTERISTICS

Material	PP, COC
Dimension(s)	Tailor-made to meet all your requirements and specifications
Volume(s)	From 1 to 10 ml
Colour(s)	Plunger and barrel colour on request
Versions	LUER, LUER Lock and NRFIT connections

MANUFACTURE

- > This range can be adapted to your requirements and specifications
- > ISO8 and ISO7 manufacturing environment

CUSTOMISED SERVICE

- > Customised printing (logo, graduation, colour)
- > Sterilisation management
- > Logistical and regulatory aspects

PACKAGING (ACCORDING TO VOLUME)

- > Single to triple liner
- > Tie or weld closing
- > Nest filling

Packaging

A complete range

Union Plastic pays particular attention to the final packaging of its products. We offer a complete range of packaging according to product type.

- Screen printing
- Pad printing
- Offset
- Laser
- Digital (numeric)

Printing

5 technologies to better serve you

Union Plastic offers a wide range of customisation solutions to suit your needs.

We use several printing technologies directly integrated into our manufacturing lines. Offset, laser, screen, pad and digital printing.

Full services

Our services cover all your needs

Union Plastic positions itself as the end-to-end partner of your projects. Thanks to the expertise of our various departments, we provide an integrated offer of high-level services.

- Sterilisation
- Research and qualification of back-up material
- Quality control delegation
- Product regulatory registration
- Welding

STERILISATION

Offer of services including qualifications:

- > Gamma
- > ETO in-house
- > Autoclave

INTERNAL BIOBURDEN CONTROL

- > Periodic or systematic sampling
- > Load mapping and cycle qualification

WELDING

- > Ultrasound
- > Laser
